PRODUCT PROGRAM 2014/15

X SERIES

SNOW THROWERS

Cub Cadet 3X THREE-STAGE

Cub Cadet 2X TWO-STAGE

Cub Cadet 1X SINGLE-STAGE

THE RIGHT SOLUTION FOR ANY DEMAND!

The Cub Cadet snow thrower programm. The best size and technique for all snow conditions. A single-stage model for regions with little snow fall and small areas, the 2-stage models for medium to heavy snow and the revolutionary 3-stage models which even pull through packed and wet snow with ease.

INNOVATIVE FEATURES FOR AN INCREDIBLE EXPERIENCE | **CUB CADET**

Cub Cadet 1X

SINGLE-STAGE

The core of the 1X Series exists of a rugged and cord reinforced rubber auger. Once in action, this rubber auger clears the path down to ground. Thanks to its ergo handle with remote control for the chute channel, a working light and even an electric start, this small power pack delivers highest comfort in a compact design.

• FOR LIGHT SNOW FALL
• GENTLE TO THE PAVEMENT
• IDEAL FOR WALKWAYS AND DOORWAYS

Cub Cadet 2X

TWO-STAGE

The 2X Series removes snow with a 2-stage system. At first stage, several "X-treme" segments, at right angle to the drive direction bite their way even through harsh and packed snow and pull it into the auger housing. The second stage is a fast rotating impeller which powerfully throws the snow far away through the chute channel.

- FOR MEDIUM TO HEAVY SNOW FALL
- FAST AND EFFICIENT SNOW CLEARING
- IDEAL FOR WIDE WALKWAYS, PARKINGS, ETC.

Cub Cadet 3X

THREE-STAGE

The revolutionary 3X-Series with 3-stage technology. At first stage two X-treme segments in the outer part of the auger housing are pushing the snow to the center, where at second stage a central X-treme segment drills through the snow and pushes it to the third stage, the impeller, which powerfully throws the snow through the chute channel far away into the desired direction.

THE REVOLUTIONARY 3X SERIES WITH 3-STAGE TECHNOLOGY

25% MORE SNOW THROUGHPUT

30% TIME SAVING

MUCH EASIER AND EFFORTLESS CONTROL

- FOR HEAVY AND WET SNOW CONDITIONS
- POWERFUL AND TIME-SAVING SNOW CLEARING
- IDEAL FOR FAST SNOW CLEARING OF LARGER AREAS

KEEP THE PATH
TO YOUR HOME CLEAN AND CLEAR.

All Cub Cadet snow throwers are made of solid steel and other high quality components. All technical features and advantages are premium level and designed for many years of hard work. The following technical details are just some of many advantages which make it so easy and comfortable to clear the path through the snow with Cub Cadet.

INNOVATIVE FEATURES FOR AN INCREDIBLE EXPERIENCE	CUB CADET

OHV Winter engines with large fuel tanks
The Cub Cadet 4-cycle OHV winter engines offer improved starting and a low emission and are especially developed for low temperatures. The large fuel tank allows for a long working without refueling. Thanks to their large displacement they offer enough power even in toughest conditions.

Electric start
Thanks to the 230 Volt electric start, you can conveniently start your snow thrower by just connecting it with a socket-outlet and pressing the starter button. One push and you are ready to go.

Clutch lock
The clutch lock system keeps both the drive clutch and auger clutch engaged with just one hand. This gives the possibility to change the chute direction or ground speed during operation. A big time saving element and more comfort while out in the snow.

Fingertip trigger controls
Zero-turn power steering is at the tip of your fingers to help you get the job done faster with effortless, single-hand turning. Easily manoeuvre driveways of all shapes and sizes, so you can get the job done in less time and with less effort.

POWER STEERING

Heated hand grips

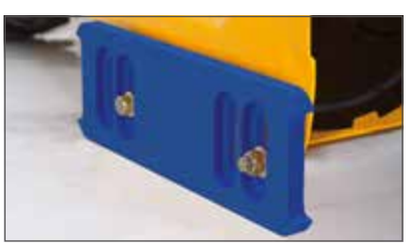
Keep your hands warm to finish the job in comfort! To activate the heated grips, just move the switch found on the rear of the dash panel into the ON position. The handles stay warm and you can keep working through the coldest weather.

Shear bolts

The shear bolts connect the "Xtreme Auger" segments with the drive shaft. If one "Xtreme Auger" segment blocks, the shear bolt of this particular segment will act as a rated break point, which prevents other turning parts from breaking. After replacing the shear bolt, the snow thrower is ready for use again. This extends the life-cycle of the machine and reduces maintenance and repair costs to a minimum.

High discharge chute

The discharge chute is exceedingly high and consists of plastic on the 2X Series and rugged steel on the 3X Series. It is clog-resistant and assures an optimal discharge of the snow. Snow throwing direction and width can be adjusted conveniently from the dashboard.



COOL BLUE skid shoes

The revolutionary COOL BLUE skid shoes glide along surfaces for better manoeuverability. The advanced long-lasting material won't rust or mar your drive way. The space between the shave plate and the ground can be adjusted by raising or lowering the skid shoes. For close snow removal, e.g. on a smooth concrete or asphalt driveway, place them in the low position. Use the middle or high position when the area to be cleared is uneven. When operating on gravel, choose the high position.

Working lights

The bright in-dash headlights allow a safe handling even in the darkness.

Drift cutters

The drift cutters which are mounted on both sides of the auger housing, break deep snow banks away and thus allow the snow thrower to power through even the heaviest drifts. Better performance and easier working in extremely deep snow.

Shovel

Conveniently fastened to the rear of the auger housing, the shovel is designed to clear the discharge chute when it is clogged. Quick and easy access.

THREE-STAGE SNOW THROWERS

SERIES 500 & 700

526 HD SWE
528 HD SWE
530 HD SWE
730 HD TDE

FEATURES

- REVOLUTIONARY 3-STAGE AUGER SYSTEM
- UP TO 76 CM CLEARING WIDTH
- 58 CM INTAKE HEIGHT
- FULL METAL DISCHARGE CHUTE
- CONVENIENT ADJUSTMENT OF SNOW THROWING DIRECTION AND WIDTH FROM BEHIND THE DASHBOARD
- COMFORTABLE 230 V ELECTRIC START
- CUB CADET 4-CYCLE OHV WINTER ENGINE
- HEATED HAND GRIPS
- CLUTCH LOCK SYSTEM
- WORKING LIGHT
- COOL BLUE POLYMER SKID SHOES
- DRIFT CUTTERS

ONE STEP AHEAD

The revolutionary 3X Series from Cub Cadet pulls through harsh and wet packed snow like a tunnel drilling machine through a mountain. That's basically what our 3-stage auger system does. It no longer scratches and break up the snow, it rather drills into it and presses it to the next stage, a vertical impeller which throws out the snow far up and away from the path. Another innovative technique made by Cub Cadet.

INNOVATIVE FEATURES FOR AN INCREDIBLE EXPERIENCE | **CUB CADET**

3X Steel accelerator auger system

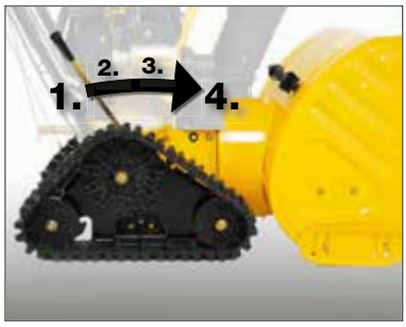
The innovative design of our auger system is now drilling into the snow with a central auger built in drive direction. It is supported by each an auger element on the L.H. and R.H. side to move the snow to the center accelerator which pushes it to the vertical impeller, that throws the snow far out.

Steel chute channel & chute flap

The chute channel on all our 3X Series snow throwers is made of thick solid steel to do the job reliably for many years. With the remote chute flap you can adjust the throwing distance and height from throwing right next beside the machine up to as far as 18 metres away.

Remote chute control

Turn the chute channel conveniently 200° from left to right from behind the dashboard in no time. The throwing distance can easily be adjusted with the on dash lever.



Balance system (730 HD TDE)

1. Packed snow: Bringing the lever in the „packed snow“ position, the weight is shifted to the front end of the snow thrower and presses this on to the ground.

2. Normal snow: This position allows the user to easily manoeuver the unit in normal snow conditions.

3. Gravel position: Use this position when clearing gravel or split walkways from snow to prevent gravel to be picked up.

4. Transport position: In this position the auger housing is lifted off the ground for easy moving without leaving scratches on the pavement.

TWO-STAGE SNOW THROWERS

SERIES 500 & 900

524 SWE

933 SWE

FEATURES

- UP TO 84 CM CLEARING WIDTH
- UP TO 56 CM INTAKE HEIGHT
- CONVENIENT ADJUSTMENT OF SNOW THROWING DIRECTION AND WIDTH FROM BEHIND THE DASHBOARD
- COMFORTABLE 230 V ELECTRIC START
- CUB CADET 4-CYCLE OHV WINTER ENGINE
- HEATED HAND GRIPS
- COOL BLUE POLYMER SKID SHOES
- STEEL DRIFT CUTTERS
- CLUTCH LOCK SYSTEM

MADE BY THE BEST TO HANDLE THE WORST.

The Cub Cadet 2X Series 2-stage snow throwers can tackle winter's biggest storms. Electric start Cub Cadet OHV 4-cycle engines, power steering and heavy-duty steel augers mean these snow throwers start quickly and move effortlessly through the harshest conditions. The high-impact polymer chute and steel shave plate make it amazingly easy to operate through heavy snow and ice, so you're out of the cold faster.

INNOVATIVE FEATURES FOR AN INCREDIBLE EXPERIENCE **CUB CADET**

Safety first

All our snow throwers are equipped with a spring loaded finger guard, which prevents you from injuries but can tilt back when heavy snow loads need to get through.

Chute control (524 SWE)

4-way chute control allows you to quickly and effortlessly change the direction and pitch of the snow you throw with one hand, so you don't waste time. You will spend less time in the cold as you control where you want the snow to be thrown.

X-trac tires

The tires have a special X-Trac tread. This allows for a perfect grip in the snow. No snow chains required!

2X Xtreme-Auger

Instead of one shear pin per auger half, the „Xtreme Auger" has one shear pin in each individual Xtreme Auger segment. This reduces maintenance costs. Snow and ice are „chopped" up by the auger blades before being fed into the impeller, which transfers the snow through the chute. Advanced technology for better performance.

Chute control
(Modell 933 SWE)

Remote chute flap control
Adjust the throwing distance conveniently with the 2-way joystick on the dashboard during operation.

Chute crank system
Turn the chute from side to side simply by using the crank. Due to the clutch lock system this can be done during operation.

FEATURES

- 53 CM CLEARING WIDTH
- 33 CM INTAKE HEIGHT
- CHUTE ROTATION 190 DEGREES
- CUB CADET OHV 4-CYCLE WINTER ENGINE
- ELECTRIC START AND RECOIL START, EASY STARTING EVEN WITH MITTENS
- REVERSIBLE, POLYMER SCRAPER
- HEADLIGHT
- FUEL LEVEL INDICATOR
- FOLDABLE, ERGONOMIC HANDLE

SMALL JOBS
JUST GOT SMALLER.

The 1X Series has the superior quality and performance you expect in a compact, easy-to-use machine. The adjustable ergonomic handle and high-impact, clog-resistant polymer chute make it easy for you to clear light to moderate snow with speed and comfort. And the in-dash headlight allows for a nice clean driveway at any time of day or night.

INNOVATIVE FEATURES FOR AN INCREDIBLE EXPERIENCE **CUB CADET**

Remote chute control
Throw the snow in any direction you want, with the on-dash remote control. Conveniently, comfortable and effortless.

Electric start & large control buttons
Large and easy to access control elements make it simple to control the power even with winter gloves. It's incredibly easy to start in tough winter conditions thanks to the 230 Volt electric starter.

High-performance auger system
This specially designed auger system works like a paddle and shovels the snow into the auger housing and then throws it out through the discharge chute. The auger is made of reinforced heavy duty rubber to avoid damages to the pavement. You will clear your driveway and sidewalk with less effort.

	Model name	221 LHP
Engine	4-cycle OHV Winter engine	Cub Cadet 70, 208 cm³
	Nominal power (kW / min⁻¹)	3,9 / 3600
	Starter	230 V electric start
	Fuel capacity	1,9 l

Drive system	Drive system	Auger-assist
	Tires	8" x 2", ball bearings
Chute system	Chute rotation	Remote lever / operator position / 190°
	Pitch control	Remote lever / operator position
Safety & Comfort	Oil fill tube	Extended for easy service
	Headlight	12,8 V / 21 W
	Weight (approx.)	41 kg

● = included – = not available

Mitten grip

The extra large mitten grip starter handle is just another well engineered detail which makes the difference of this premium snow thrower.

Fuel level indicator

Provides clear information on the fuel level without the need for opening the gas cap.

Ergo-handle

with full bail switch allows for fatigue-proof operation.

WINTER EQUIPMENT
FOR CUB CADET LAWN- AND GARDEN TRACTORS

Use your Cub Cadet lawn- or garden tractor all year around with the right attachments. With a front mounted dozer blade or snow thrower in combination with snow chains and spreader you are prepared for the challenges of a long lasting winter season.

INNOVATIVE FEATURES FOR AN INCREDIBLE EXPERIENCE | **CUB CADET**

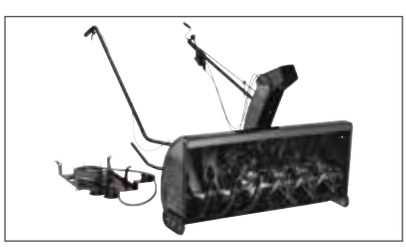
Dozer blades

- **OEM-190-833** 117 cm dozer blade, fits all 700 and 1000 series lawn tractors.
  - With adjustable spring loaded overload protection system
  - 3 angling options (left, right, straight)
  - With remote lifting handle to operate from the driver's seat

- **19A40022100** 117 cm dozer blade for garden tractor GTX 2100.
  - Heavy duty fabricated version
  - With adjustable spring loaded overload protection system
  - 3 angling options (left, right, straight)
  - With remote control handle to fully operate and lift from the driver's seat

Rubber lip for dozer blades

- **196-718-678** Universal rubber blade lip for all our dozer blades. Simply cut it to your desired length.



Front mount 2-stage snow thrower

- **OEM-190-032** Fits 1000 series side discharge tractors.
  - 107 cm clearing width
  - Full remote control from driver's seat
  - Belt drive system and front mount bracket included

Front mount sweeper

- **196-226C678** Fits 1000 series rear discharge tractors.
  - 105 cm working width
  - Full remote control from driver's seat
  - Belt drive system and front mount bracket included

- **196-227A678** Front collector for front sweeper model 196-226C678

Snow chains

- **196-664-643** 1 set of tire chains, for tire dimension 18" x 6.5"

- **196-898A699** 1 set of tire chains, for tire dimension 18" x 9.5"

- **196-964-678** 1 set of tire chains, for tire dimension 23" x 9.5"

Broadcast spreader

- **196-031-000** Tow-Broadcast spreader, weight approx. 8 kg, volume 39 kg, spread width up to 300 cm, pneumatic tires

Battery charger

- **196-967-678** Electric battery charger with 12 V plug, 1000 mA for all tractor models

ACCESSORIES
FOR CUB CADET SNOW THROWERS

Make more out of your snow thrower with an additional dozer blade. Use this dozer blade, when having little snow fall only, or thin layers of heavy wet snow.

INNOVATIVE FEATURES FOR AN INCREDIBLE EXPERIENCE | **CUB CADET**

Dozer blade

- **396-004-678** Suitable for all Cub Cadet 2X and 3X Series snow throwers
  - 100 cm working width
  - Zinc coated
  - Pivoting to the right and left
  - With fast attach system
- **396-005-678** Optional rubber lip

Cover for snow throwers

- **2024-U1-0005** Fits all Cub Cadet snow throwers
  - Heavy gauge vinyl cover with straps
  - It is UV-resistant and water-repellent
  - Measurements: approx. 170 x 80 x 100 cm

Shear bolts

- **7011-M6-0010**
  - For all models except 933 SWE
    The shear bolts connect the auger with the drive shaft.
    In case of unintended blocking of the auger, the shears act as rated break points.
    Set of 4 bolts and cotter pins.
- **7011-M6-0011**
  - For model 933 SWE

Winter engine oil

- **6012-X1-0040** We recommend the use of Cub Cadet winter oil for all Cub Cadet snow throwers.
  - Special winter engine oil (SAE 5W-30)
  - Capacity: 1000 ml

Fuel stabilizer „Easy-Run“

- **6012-X1-0045** Snow throwers have often long period of non-use. Therefore, we recommend to use a fuel stabilizer. This fuel conservation with oxidation protection binds water and protects the system against rust and corrosion. A reliable starting is thus assured.
  - Capacity: 250 ml

WARRANTY

*Manufacturing guaranty of MTD Products AG, limited supplementary performance, valid only through registration on https://b2c.cubcadet.eu
WARRANTY
3
YEARS*
Cub Cadet

Benefit from a **3-years warranty** when buying a **Cub Cadet** snow thrower!

In order to acquire the **3-years warranty**, you only have to register your snow thrower within a maximum of 60 days from the day of purchase. For more information, please visit the registration page:

https://b2c.cubcadet.eu

The **3-years warranty** is then valid according to the MTD Products AG warranty conditions. Please ask your authorized dealer for more information.

* Manufacturing guaranty of MTD Products AG, limited supplementary performance, valid only through registration on https://b2c.cubcadet.eu

ARNOLD®
BE PART OF IT

Your parts specialist

Since November 2011 **ARNOLD** offers a various range of wearing parts and accessories for gardening, forestry and landscaping use all over Europe.

Additional to our variety of spare parts for all common brands **ARNOLD** is offering high quality workshop equipment and various accessories.

From Air filter till Wheels

The **ARNOLD** program includes all products to make working in and around the garden more comfortable and safe.

All **ARNOLD** articles are available for you in the market.

Cub Cadet

GENUINE Cub Cadet FACTORY PARTS

Perfect match, high durability.
Cub Cadet spare parts

- Designed for your machine
- Offer the best performance & reliability
- Only original parts get your machine warranty
- Rapid and sustained availability in Europe
- Tested according to our highest standards

AUTHORIZED DEALER

SERVICE AND MORE

Cub Cadet equipment is only available from an authorized Cub Cadet dealer, who can offer you a wide range of products and services. The dealer aims to provide fast, convenient service for you, whether you are interested in a new piece of equipment or simply need more information about a product or service.

Professional advice:

Each Cub Cadet dealer's sales staff is specially trained in selling lawn and garden equipment as well as snow throwers. They have been advising customers for many years and will help you choose the right piece of equipment.

Delivery service:

Large pieces of equipment that you are unable to transport yourself can be delivered right to your door by the Cub Cadet dealer.

Demonstration:

Your Cub Cadet dealer offers you the chance to start up the equipment and try it out yourself before you buy. At Cub Cadet, you know what you're getting!

Repair service:

If your equipment ever breaks down, your Cub Cadet dealer won't send it away but will repair it in his own workshop. Cub Cadet dealers specialize in providing repairs and replacement parts.

Professional assembly:

Cub Cadet dealers fully assemble all equipment so you can start using it right away. Only well-assembled equipment and thorough instructions guarantee satisfaction.

Financing:

Would you like to pay for your new equipment conveniently over the next few years? No problem! Your Cub Cadet dealer can offer you a suitable financing option.
